

Avalon's projects

Avalon is an international non-profit foundation promoting sustainable rural development based on organic agriculture and nature management in Central and Eastern Europe, West-Africa and beyond. In co-operation with a vast network of local organisations, governments, universities, businesses and associated specialists, Avalon has implemented a wide range of activities in this field. The EU, the Netherlands government, international financing institutions and co-financing organisations are important financial contributors to these activities.

Since its establishment in 1991 Avalon has carried out projects in more than 25 countries. In the scheme on the right the activities per country are shown.
